PART.1
About CoinEx Smart Chain (CSC)

About CoinEx Smart Chain (CSC)

CoinEx Smart Chain

- Created by CoinEx Public Chain Team and tailor-made for decentralized financing, CoinEx Smart Chain (CSC) is a decentralized and efficient public chain with extremely high efficiency and low transaction fees while maintaining full compatibility with Ethereum ecosystem.
- Based on PoS consensus protocol, CoinEx Smart Chain is decentralized and energy efficient. CSC makes it easy to build your own decentralized applications.

Features of CoinEx Smart Chain (CSC)

Full compatibility with Ethereum ecosystem

Built on the Ethereum Virtual Machine (EVM), CSC makes it simple for the developers to migrate DApps to CSC using mature development tools, and guarantees easy access to CSC network for all users.

Permission-free validators Make it more decentralized

CSC supports a maximum capacity of up to 101 validators simultaneously, which are sorted and selected by their CET staking, completely free of permission, making the network more decentralized.

Extremely high efficiency Low transaction fees

CSC adopts POS consensus protocol to achieve block generation times in seconds, and maintains low transaction fees on support of extremely high TPS.
(Less than 0.1CET ~ About 0.005 USD)

PART.2
Project Incentives Plans

How to work with CSC

To perfect a high-performance smart chain ecology for CoinEx Smart Chain (CSC), improve basic track facilities and enrich track environment for CSC developers, CSC Seed Fund of millions of US dollars was founded to recruit outstanding developers from all over the world to build decentralized applications on CSC.

1.

Funding

2.

Funding + Publicity

3.

**Funding + Publicity
+ Ecology**

Funding Support

According to the performance, the projects will receive funding support from CSC Foundation, categorized in 3 levels according to different situations:

Regular Projects

- Level 1: 1,000 USD–10,000 USD bonus for a singular project, dedicated to new projects designed by new developers.
- Level 2: 10,000 USD–50,000 USD bonus for a singular project, dedicated to developers with certain project experience and innovations in DApp technology and content.
- Level 3: 50,000 USD–100,000 USD bonus for a singular project, dedicated to developers with mature project experience and excellent innovations in DApp technology and content.

Projects with Strategic Cooperation

- Receive **at least 200,000USD** of funding support in the name of CoinEx Smart Chain

Funding + Publicity Support

We will select high-quality projects amongst those that have already received our funding support, and further support them with the publicity resources. The arrangements are as follows:

A. DeFi (Lending, EVM, Dex, Assets, Cross-chain, Derivations, Yield Aggregator)

- CSC will provide with a batch of liquidity funding plus media support.

B. Fundamental Facilities (Dev tools, Wallets, Mining Pools etc)

- CSC will provide with media support, publicity via official channels and SNS promotional support.

Funding + Publicity + Ecological Support

All-round ecological support will be provided to the mature and quality projects, aside from funding and publicity support.

***PART.3** CSC Ecology*

CSC Ecology

CoinEx Ecology

ViaBTC Mining Pool

ViaBTC - A world-leading comprehensive cryptocurrency mining pool serving users from more than 130 countries/regions with highly secure and efficient mining services.

ViaWallet

ViaWallet - A decentralized multi-cryptocurrency wallet supporting users' self-control for private key with one-stop management.

CoinEx Exchange

CoinEx Exchange - A professional cryptocurrency trading platform that supports perpetual contract, spot, margin and other derivatives trading.

ViaBTC Capital

Focused on Cryptocurrency Investment in the Primary and Secondary Markets, Providing Incubation Services for Quality Projects.

CoinEx Smart Chain

CoinEx Smart Chain - Based on PoS consensus protocol, decentralized and energy efficient, CSC makes it easy to build your own decentralized applications.

OneSwap Dex

It can be implemented and deployed on any blockchain that supports smart contract. Deployed on ETH, TRON, BSC and CSC respectively, OneSwap released a series of functional services such as liquidity mining, mining referral and community governance etc.
